ADDENDUM NO. 3

ISSUE DATE: March 17, 2016

Emergency Mass Notification System

RFP NO. 16008

Issued By:

LOS RIOS COMMUNITY COLLEGE DISTRICT
1919 Spanos Court, Sacramento, CA 95825
Phone (916) 568-3071    Fax (916) 568-3145

This addendum forms a part to the Contract Documents. The addendum items supersede and supplement all portions of the RFP documents with which it conflicts. All workmanship, materials, appliances and equipment which may be included in the following addendum items shall be of the same relative quality as described for similar work set forth in the general or main specifications of which these addendum items shall be considered a part.

This Addendum is considered part of the RFP documents.

CLARIFICATIONS:

1) If WARN provides items under any “technical requirements” and the answer is, Yes (delivered as specified), is anything further required under the three adjacent columns, “Requires Customization,” “Provided by Third Party,” or “Reference page of supporting document.”

Response:
Per the paragraph under the heading Technical Requirements (page 8 of the RFP), a narrative detailed description is required. The columns on the right side of the grid should be completed as applicable. Narrative descriptions can be provided within the grid or in a supporting document, in which case a page reference is required.
2) Page 5 under System Capabilities states “In-building mass notifications to provide information and instructions to people in a building using voice communications, visible signals, text, graphics, tactile or other communication methods.” There is no information as to which buildings will have this and in what areas. Are there more documents or is this something planned for the future?

3) Page 5 under System Capabilities states “Wide-area mass notifications that provide real-time information to outdoor areas and may also have the capability to communicate with other notification systems on campus.” There is no information as to which areas will be covered. Is this a requested capability for future use or are there more documents showing the plan?

4) Page 5 under System Capabilities states “Two-way emergency communications that building occupants can use to signal duress and that responders can reply, signal or listen-in to the area(s) of duress.” Again there is no detail in the RFP. There is no information as to how many and where they will be located. Is this a requested capability for future use or are there more documents showing the plan? Page 5 Under System Capabilities states “Duress/panic buttons located on walls, under desks and near doorways. Pushing a button transmits a dedicated signal to a central console. Using visible and/or audible enunciations, the console can identify the location of the event where the alarm was triggered. Duress/panic button systems may include electronic device signaling, such as computer keystrokes.” Addendum 2 RFI 4 states Wired and Wireless Buttons: a. Does the district currently have Duress Buttons installed? If so, can the district provide: Quantities, Type, and Manufacturer? Response: a. We have hard line panic buttons in locations of value (bookstore, business office), however, the District is not interested in tying into a mass notification system. Please reconfirm that this is not part of the scope of this RFP.

5) Lastly, We have the recent addendum 2, and addenda 1. Is there another document we are missing? It seems like we should have plans or something further to complete the RFP package.

Response:

2-4) With regard to the System Capabilities outlined on page 5 of the RFP, vendors are encouraged to include information regarding the categories as may apply to the system(s) being proposed. These descriptions are not related to current system functionality as exists within Los Rios Community College District today.

5) The initial RFP document (23 pages), Addenda 1, 2 and 3 comprise the entire RFP.
